This map reflects cases, not convictions. Cases do not always reflect actual violations of the law but rather the need to investigate whether or not violations have occurred. Knowing the location, number and types of cases can be useful when evaluating prevailing circumstances in a given neighborhood. However, in the absence of additional information, it would be wrong to conclude from a map of this kind that any person, property owner or property manager was guilty of misconduct.

The information depicted is provided as a graphical representation only. The City of Boulder provides no guarantee, expressed or implied, as to the accuracy and/or completenss of the information contained hereon.
