SPECIAL ENVIRONMENTAL HEALTH REPORT

Name of Establishment Allied Chemical Co.

Address 63RD + Valmont Rd Type of Establishment

Person Interviewed Mr Swebel Telephone Number

Purpose of Visit Complaint of discharge from above plant

Bob Bondo and I visited Allied Chem. Plant on 63RD + Valmont Rd concerning complaint by Sheriffs Dept. that Allied Chem. was discharging chemicals into ditch along road. On inspection we found clear, odorless liquid flowing in ditch with Ph of >8.0. Followed ditch to point where it travels underground. Placed dye into stream at this pt. and found that it crosses under the road and empties into a larger irrigation ditch on the south side of the road and from there flows into a holding pond located near the fork in Valmont Rd near the KOA Campground. From the pond the water empties into a ditch and then into Boulder Creek.

Mr Swebel, plant foreman, advised me that above flow was cooling water from distillation process and boiler and has always drained down this ditch. He also states that above operation has been inspected by representatives of Colo. State Health Dept who apparently found no violations.

Re: Allied Chem. Co.

Good work. Next week, you had best check the file on this discharge. If as I suspect you had best clear with Don + Pugsley as to further action
