Population Estimates & Projections:
Methodology & Assumptions:
The city of Boulder population estimates and projections are developed in conjunction with the Denver Regional Council of Governments (DRCOG). Existing estimates are developed using the United States Decennial Census numbers as a baseline and are projected forward using Certificates of Occupancy for completed housing units and an average person per unit multiplier. An area wide vacancy rate is then applied to the unit counts to arrive at an estimated population. Projections of population are developed from the assumed buildout potential of the city based on the BVCP land use map and zoning map.

BVCP Planning Areas
To manage growth and provide urban services efficiently, the Boulder Valley Comprehensive Plan (BVCP) designates three areas for long-term planning:

- Area I: Land within city limits, provided with urban services.
- Area II: Unincorporated land in Boulder County, eligible for annexation and provision of urban services within the 15 year planning period of the BVCP.
- Area III: Unincorporated land in Boulder County outside the Service Area, intended to remain rural in character.
