

HILL PROJECTS FACT SHEET

COMMUNITY, CULTURE, & SAFETY TAX

Ballot Initiative 2A is a proposed temporary, three-year, sales tax increase of 0.3 cents. Funds would be used for unfunded City projects including capital improvements to the Civic Area, University Hill Commercial District and High Density Residential Area, and Boulder Creek path in the downtown area. Additionally, the increase would fund preservation and restoration to public art, and improvements to the Dairy Center and Museum of Boulder. Any remaining funds would be used for other Capital Improvement projects approved by the City Council.

HILL PROJECTS

Commercial District Tree Street Irrigation (\$520,000) This project would provide irrigation systems, as well as select new trees and tree grates and guards to ensure sustainability of the trees and to meet City standards. This project will also free up maintenance staff to focus on other tasks such as public space maintenance and litter removal.

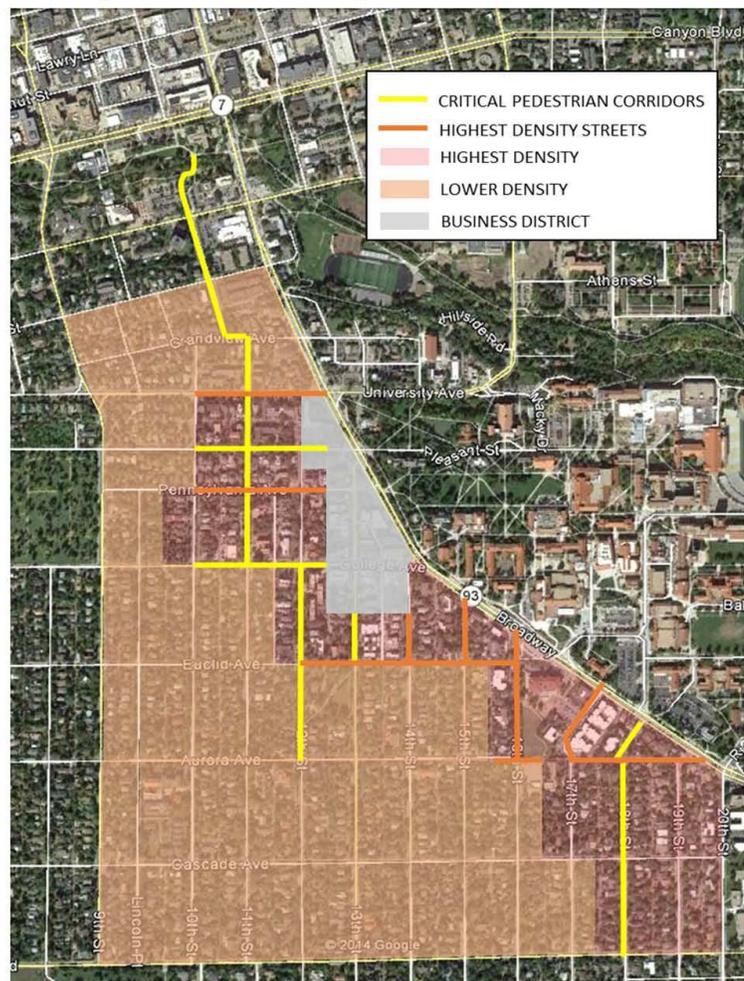

Commercial District Event Street (\$750,000) University Hill does not currently have public space designed for events and gathering. The goal is to create a special place that will bring the community together and redefine public space. Community Space would be created on Pennsylvania Ave from 13th Street to the alley. This space would include a shared street, accessible to bikes, pedestrians, and vehicles, that could be easily closed for community events.

Pedestrian Scale Street Lighting in the High Density Residential Area (\$2,000,000)

Street lighting would be added along the Critical Pedestrian Corridors (as shown in illustration) to ensure safety for pedestrians on sidewalks at night. LED lighting would include a control system to monitor lights and identify outage. Lights will dim during the lowest activity periods to conserve energy.

SPECIFIC RECOMMENDATIONS PER AREA

The University Hill lighting is divided into areas as depicted below:

07 July 2014

CLANTON & ASSOCIATES
LIGHTING DESIGN AND ENGINEERING

Summary of Recommendations
Boulder Hill Lighting Improvements
