

## 30<sup>th</sup> & CO Underpass Project Summary of Comments Received

### May 3, 2018 Open House

Approximately 40 people engaged with the 30th & Colorado Underpass station at the May 3, 2018 30<sup>th</sup> & Colorado Corridors Study open house. Of those who stopped, 2 completed comment forms and 2 comments were placed on the presentation boards.

Regarding the underpass concepts, one comment stated support for underpass concept C (east-west) and one comment requested a north-south underpass of Colorado be moved east near the current location of mid-block crossings near 33<sup>rd</sup> Street near the eastbound Stampede stop.

The comment forms requested on-street improvements for multi-use paths to be constructed east of 30<sup>th</sup> Street on the north and south side of Colorado to support bi-directional travel along that street, that multi-use paths between the Boulder Creek Path and Colorado Ave be incorporated into the project improvements to support current travel connections between the path, Smiley Court and current mid-block crossings near 33<sup>rd</sup> Street, and that the bike facilities be kept off-street as much as possible because cars will use the on-street bike lanes as turn lanes at the intersections.

The comments placed on the presentation board reiterated the request for a north-south underpass of Colorado Ave be built near 33<sup>rd</sup> Street and the request for bike lanes to remain separated from traffic, and added a request for wayfinding.
