

Previous mapping of Boulder Slough was approximate and did not delineate the High Hazard Zone.

**High Hazard Zone:**  
The area of the floodplain where there is the greatest risk of loss of life. This includes areas in the floodplain where the flood water velocity (feet per second) multiplied by the flood water depth (measured in feet) would equal or exceed four feet or where flood water depth alone would equal or exceed four feet.

**Legend**

-  Proposed Boulder Slough High Hazard Zone
-  Revised Boulder Creek High Hazard Zone
