

Diagonal Highway Construction Begins Early August!

* Reconstruction of the existing street pavement between 28th and 47th streets.

* Construction of a new multi-use path, off-street bicycle lanes ("cycle tracks"), medians, transit stop bus pads, and other amenities.

* Re-striping of the roadway to add buffered, on-street bike lanes between Foothills Parkway and Independence Road.

* Installation of public art, trees and landscaping to create a "Gateway" to/from Boulder.

* Installation of new curbs, gutters, storm drains, water quality systems, and irrigation systems.

There will be periodic single-lane closures during off-peak hours, with two through lanes of traffic maintained in each direction during peak hours. Pedestrian and bicycle detours will be in effect. Driveways and business access points will remain open throughout construction. The entire project will be completed by fall, 2016.
