Marcy: Stephen Sparn is planning on submitting an ADA Assessment to you with an engineer's report so that it can go with your Board packet materials. He pretty much goes through everything, although one thing I would add just generally is that uneven ground in and around the structure poses safety concerns and would also make egress in the event of an emergency problematic, both upstairs and downstairs. Also, just from a layperson's perspective, I found that the carport not only gets snow and ice in it from the driveway, but also near the door itself and the doorstep where the carport truss is open. I tried to capture that with my cell phone camera (photos hopefully attached). Let me know if anything else would be helpful. Thanks, Stephanie
