Minimum Requirements (other code requirements may apply):

1. All roofing material must have a Class “A” rating per BRC 1981 sec. 10-5-5 and IBC sec. 1501.1 and IRC sec. R902.1 as amended.
2. IRC Section R905 requires asphalt shingles to comply with ASTM D 225 or D 3462. Since Boulder is a high wind area, asphalt shingle wrappers must also bear a label indicating compliance with ASTM D 3161 Class F.
3. The wind speed design must be a 3-second gust (manufacturers specifications must be available at time of inspection). Provide manufacturer’s specification sheet for product and verification of fire-rated assembly with this application.
4. The maximum wood fiber content must be less than 50% by volume.
5. No person owning a building with wood roof covering materials shall fail to remove or cause to be removed from the building all wood roof covering materials before January 1, 2014, and to replace the removed roofing with approved roof covering materials which conform to the *International Building Code* as adopted, and no person shall thereafter take possession or ownership of a building with wood covering material.
