Civic Area Events

Civic Area Phase 1 construction will begin later this year and there are efforts underway to ensure the park's smooth construction and sustainable future. The City of Boulder has formed an Interim Civic Area Governance Team charged with implementing a short-term plan focused on Phase 1 sustainability and activation. As part of the larger Civic Area Steering Committee, they are exploring ease of use, potential funding models and partnership opportunities critical to the area's vibrancy and long term success.

Priorities:

- City-produced activation and coordination of partnership programming;
- Evaluation of future maintenance, activation needs and opportunities;
- Donor Recognition and Sponsorship opportunity identification;
- Event producer coordination/staging of Civic Area events during construction.
