

Alpine-Balsam BCH Storytelling

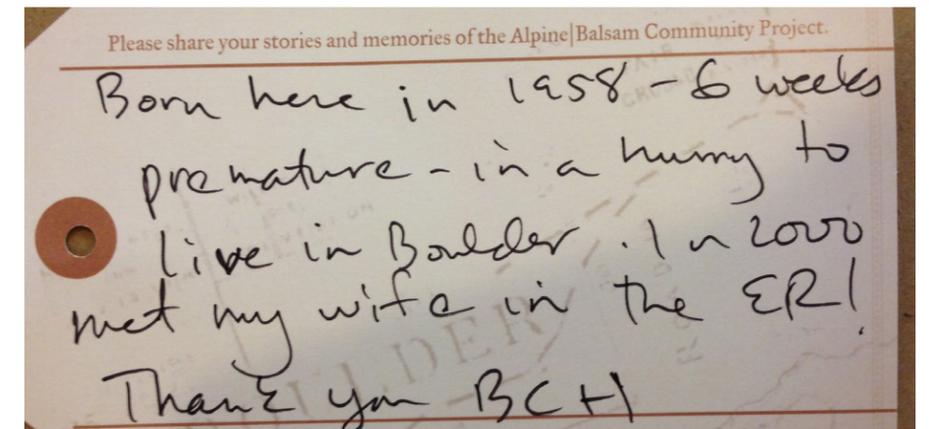

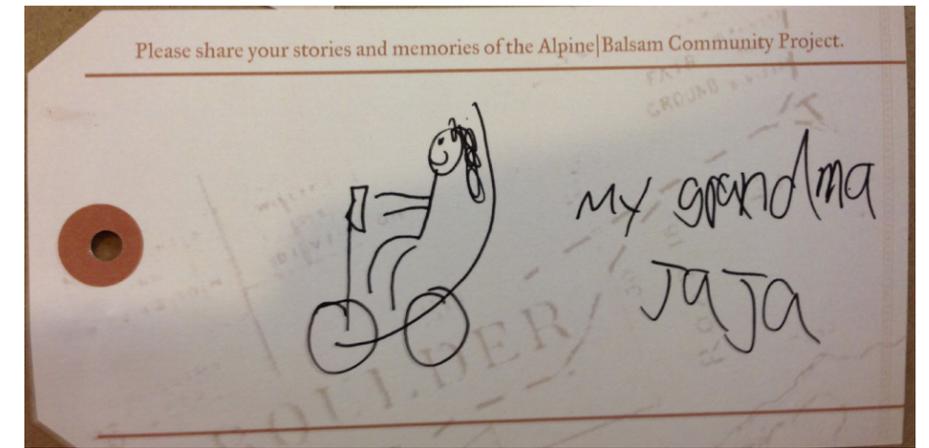

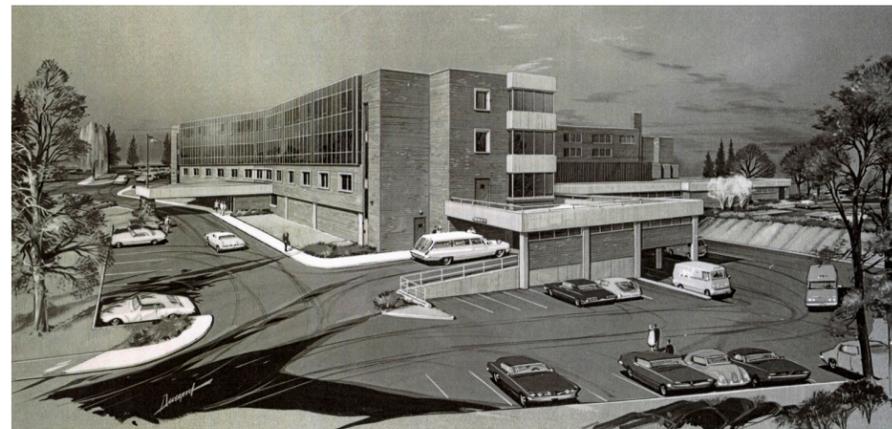

Throughout the spring/summer of 2016, the City asked the Boulder community to share their experiences, stories and memories of the Boulder Community Health (BCH) hospital. By allowing people to share their experiences, we accomplished the following goals:

- Provided an opportunity to remember and acknowledge the different ways in which the hospital has impacted our community
- Identified common community threads and themes
- Carried these themes forward into the next planning phase to inform future visioning for the site
- Communicated overall long-range planning process and timeframes while interacting with the community and developing feedback loops for the future
- Captured archival historical pieces and shared with community

Common Themes

- Community resource and asset
- Security and safety
- Education and support
- Healing, loss, recovery, life cycle
