I. PURPOSE

The purpose of the 2001-2002 Boulder Survey of Historic Places was to conduct a resurvey of the University Hill residential neighborhood and prepare Colorado Historical Society Re-evaluation Forms for approximately 800 structures located in the area. The structures in the area were originally surveyed between 1990 and 1995 by Front Range Research Associates, Inc. as part of the ongoing Boulder Survey of Historic Places. The resurvey focuses on changes or additions to previous survey descriptions. The resurvey also reevaluates boundaries of eligible National Register and local historic districts identified in previous surveys. Additionally, the resurvey identified non-surveyed buildings and divided them into two groups: those built before 1952 and those built after 1952. The resurvey also identified all contributing alley outbuildings associated with previously surveyed and non-surveyed buildings. The primary purpose of the survey report is to present the survey methodology and results; it does not contain historic context information, which was completed in past surveys of the University Hill neighborhood.¹

This project was financed in part with Federal funds from the National Historic Preservation Act, administered by the National Park Service, U.S. Department of the Interior and for the Colorado Historical Society. However, the contents and opinions do not necessarily reflect the views or policies of the U.S. Department of the Interior or the Society, nor does the mention of trade names or commercial products constitute an endorsement or recommendation by the Department of the Interior or the Society.

This program receives Federal funds from the National Park Service. Regulations of the U.S. Department of the Interior strictly prohibit unlawful discrimination in departmental Federally assisted programs on the basis of race, color, national origin, age or handicap. Any person who believes he or she has been discriminated against in any program, activity, or facility operated by a recipient of Federal assistance should write to: Director, Equal Opportunity Program, U.S. Department of the Interior, 1849 C Street, N.W., Washington, D.C. 20240.

The project funds were granted to the City of Boulder Planning Department and the Boulder Landmarks Preservation Advisory Board. The survey was conducted following the guidelines of the Colorado Historical Society OAHP publication “Colorado Cultural Resource Survey Manual, Volume I and II.” Kathryn Howes Barth and Lara Ramsey, consultants to the City of Boulder Planning Department, from October 2001 until May 2002, conducted the resurvey.

The City of Boulder enacted a preservation ordinance in 1975 that provides for the protection of historic sites, structures, and districts. Boulder also participates in the Certified Local Government program administered by the National Park Service and the Colorado Historical Society. As part of the City's ordinance, a Landmarks Preservation Advisory Board is appointed to oversee the provisions of the ordinance, including the designation of local landmarks and districts.

In recent years, the University Hill neighborhood has faced problems of neglected buildings and redevelopment pressures resulting in inappropriate alterations, additions,

or demolition. Because previous historic surveys of this area are ten years old, there is concern that many of the historic resources in the area may have been compromised since the early 1990’s. The Boulder Landmarks Preservation Advisory Board identified this resurvey project as a high priority work program item for the year 2001. In addition, the University Hill Action Group completed a report in the year 2000 that takes note of the declining condition of the University Hill neighborhood and calls for measuring support for both a residential and commercial historic district in University Hill. The results of this resurvey will be used to identify resources eligible for local landmark designation and will be a critical step towards the potential implementation of a local historic district in the area.
II. SURVEY AREA

The 2001-2002 Boulder Survey of Historic Places reevaluated previously surveyed structures within the University Hill residential neighborhood. The survey area boundaries extend generally from Broadway on the east, to the alley between 8\(^{th}\) Street and Grant Place on the west, to the alley between University Avenue and Pleasant Street on the north, to Columbine Avenue on the south (see Map 1: Study Area). The previously surveyed commercial portion of the neighborhood on 13\(^{th}\) Street between Pennsylvania Avenue and College Avenue was not included in the project. The study area is located in: Township 1 South, Range 70 West, Section 6; Township 1 South Range 70 West, Section 31; and, Township 1 North, Range 71 West, Section 36, Sixth Principal Meridian, Colorado. The survey area encompassed approximately 268 acres of urban land and is located in both the Boulder and the Eldorado Springs Quadrangles (see U.S.G.S. Quad Map).\(^2\)

Historic residential additions within the entire survey area include: University Place (1890); University Terrace (1894); Capitol Hill (1902); University Park (1906); Replat of University Place (1909); Chautauqua Heights (1906); Rose Hill (1893); Floral Park (1906); and, Wellington Heights (1907).\(^3\)

The University Hill area topography slopes down from the southwest to the northeast. Points of interest include University Hill Elementary School (16\(^{th}\) Street and Broadway), Columbia/Pioneer Cemetery (9\(^{th}\) and Pleasant Streets), and the Academy (965 Aurora Avenue). The area is predominantly single family residential in character, with scattered fraternity and sorority houses and apartment buildings. To the northeast of the survey area lies the University of Colorado campus. Blocks in the area are predominantly oriented on a north-south axis.

III. RESEARCH DESIGN AND METHODOLOGY

Previous Survey Work

Previous surveys of this area spanned six years: in 1990, 278 buildings in the northern portion of this area were surveyed; in 1991, 270 buildings in the central and southwestern parts were surveyed; in 1992, 53 buildings in the eastern portion were surveyed and 14 previously documented resources scattered throughout the area were resurveyed. Results of these three surveys recommended a field eligible National Register Historic District in the University Hill area. Districts determined eligible for the National Register are automatically eligible as local historic districts. In 1995, a reconnaissance level survey identified eligible local historic districts adjacent to the National Register eligible district; these were called “expanded local district boundaries” (see Map 2: 2000 Boulder Valley Comprehensive Plan, National Register and Local Eligible Historic Districts). No new survey forms were completed during the 1995 project, but a reconnaissance level survey categorized all buildings within the eligible district based on Boulder’s local evaluation criteria (see Attachment A: City of Boulder’s Local Evaluation Criteria). In 1996, the commercial portion of the University Hill neighborhood (13th Street between Pennsylvania and College Avenues) was reevaluated and determined eligible as a stand-alone local historic district. 4

Scope of Work

The 2001-2002 Boulder Survey of Historic Places called for an intensive level reevaluation of the University Hill residential neighborhood and the preparation of Colorado Historical Society Reevaluation Forms for approximately 800 sites located in the study area. The buildings were to be resurveyed and photographed, focusing on changes or additions to previous survey descriptions. A Colorado Cultural Resource Reevaluation Form 1405 was to be completed for each resource, specifically detailing Item 8: Changes or Additions to Previous Descriptions, and Item 13: National Register Eligibility Assessment. Item 13 was expanded to include the City of Boulder’s local evaluation criteria for buildings within locally eligible historic districts (see Attachment A).

All properties resurveyed were to be photographed with prints developed for properties that have undergone “extensive alteration” since the previous survey. For the purposes of this survey, “extensive alteration” includes, but is not limited to second story additions, enclosed front porches, replacement vinyl siding, major window alterations, major landscaping alterations that impact the building, or any alteration that would change a building’s status from contributing to non-contributing.

Boundaries of previously identified eligible historic districts were to be reevaluated utilizing the City of Boulder’s local significance criteria and/or the National Register Criteria.

A final survey report was to include a listing of all properties surveyed, their state identification numbers, an evaluation of their significance, and a map, which clearly identifies project boundaries, potential districts, and individually significant properties.

---

The survey report was not to contain historic context information on the neighborhood, which is contained in previous survey reports.

The results of the survey are to be used to identify potential local landmarks and/or historic districts, and to help ensure that development and redevelopment proposals consider impacts on cultural resources.

**Project Participants**

Kathryn Howes Barth and Lara Ramsey of Boulder, Colorado, conducted the resurvey as consultants to the City of Boulder Planning Department. Deon Wolfenbarger, Preservation Planner with the City of Boulder Planning and Development Services Department supervised the project. Larry Ferguson, GIS Staff with the City of Boulder Planning and Development Services Department, assisted with the database development, management and mapping component. Brad Finch of Kansas City, Missouri developed the Microsoft Access Database and revised the printed forms. Suzanne Doggett with the Colorado Historical Society met the consultants to assess project progress.

**Preliminary Research and Field Work**

Initial work on the project began in September 2001. The Colorado Cultural Resource Form 1405 was recreated using Microsoft Access establishing a database for data-entry and a revised printed form. The Boulder County Assessor’s data was linked to the database, including assessor’s identification number, property address, owner name and address, year built and building square footage. Maps of the study area showing building addresses and footprints were obtained from the City of Boulder Planning Department for fieldwork purposes. Copies of previous survey reports for the area were also obtained from the Planning Department and referred to throughout the project. Historic assessor cards and Sanborn Fire Insurance Maps from the Carnegie Branch Library for Local History, City of Boulder building permit files, and files from the City’s Central Records were all referred to for buildings in question. Resurvey work began in September 2001 and continued through May 2002.

**Photography**

Photography was conducted from September 2001 through May 2002, with the bulk completed by November 2001. A black and white photograph was taken for each resource resurveyed and a contact sheet developed. Prints were developed for properties that experienced “extensive alterations.” In addition, prints were developed for buildings that were determined potentially eligible for local landmark designation. All prints developed were four by six inches and were produced on black and white print paper from thirty-five millimeter negatives. Photographs developed were labeled indicating property address, Smithsonian identification number, film roll and frame, camera direction, and date.
Mapping

Larry Ferguson converted and loaded the Microsoft Access Database into the City's GIS system. The relational database was spatially (building and parcel polygons) joined to geographic features so that it could be presented in hard copy map format. Maps were prepared showing the survey area, surveyed sites, potential local and National Register district boundaries, building status, contributing outbuildings, and individually significant buildings.

Preparation of Forms and Reports

After completion of the fieldwork, approximately 700 Colorado Historical Society Cultural Resource Re-evaluation Forms 1405 were prepared using the Microsoft Access Database (see sample form, next page). The form includes the following information: property address, Smithsonian identification number, list of attachments, historic resource name, purpose of the current site visit, previous recording dates, changes or additions to previous descriptions, square footage, changes in condition, UTM coordinates, changes in ownership (i.e., new owner name and/or address), eligibility assessment, photograph roll and frame number, report title, and recorders name and date. In terms of eligibility assessment, the forms were revised to include locally designated landmarks and to expand the local district building categories to include the contributing-restorable category (see Attachment A).

Attached to each reevaluation form is a U.S.G.S. map photocopy showing UTM coordinates for the property. Black and white prints were attached to the forms of properties that experienced extensive alterations since the previous survey or had a change in building status (for example, a building determined potentially eligible for local landmark designation). Sketch maps, which show primary building footprints, were prepared for properties with footprint changes since the previous survey.

Expected Results

It was anticipated that approximately 25% or 200 of the 800 buildings reevaluated would have undergone extensive exterior alterations since previous surveys. It was also anticipated that some modification would be made to the boundaries of previously identified eligible historic districts in the area.

IV. RESULTS AND RECOMMENDATIONS

The 2001-2002 Boulder Survey of Historic Places resurveyed approximately 700 structures within the University Hill residential neighborhood (see Map 3: Surveyed Buildings and Tables 1 and 2: List of Sites Resurveyed). The resurvey focused on changes or additions to previous survey descriptions. The resurvey also reevaluated the boundaries of previously recommended eligible National Register and Local Historic Districts and determined each building’s status within the district. Additionally, the resurvey identified all contributing alley outbuildings associated with previously surveyed and non-surveyed buildings. The resurvey identified non-surveyed buildings and divided them into two groups: those built before 1952 and those built after 1952.

ELIGIBLE HISTORIC DISTRICTS

Period of Significance

Previous surveys recommended a period of significance for both the eligible National Register and the Local Historic Districts as extending from 1892 to 1942, representing the time in which the neighborhood subdivisions were platted, development began, and construction in the neighborhood was essentially complete. In addition, the end date of 1942 was chosen because, at the time of the 1992 survey, properties less than 50 years of age (those constructed after 1942) had not yet been surveyed.

During the resurvey, the period of significance for the eligible historic districts was reevaluated by studying the historic development patterns in the area. Of the total resources resurveyed in the area, a small number (2.3%) of the buildings were constructed in the 1890s. Construction of the streetcar line through the area and a construction boom in the 1900s resulted in the construction of approximately 17% of the buildings. Development remained steady in the 1910s with construction of approximately 13% of the buildings. The peak of construction in the area was during the prosperous 1920s, representing construction of 32% of the buildings within the area. The depressed economy on the 1930s is reflected in a sharp decline in construction, resulting in the construction of 8.5% of the buildings. 11% of the buildings in the area were constructed in the 1940s and 9.7% of the buildings were constructed in the 1950s. Notably, the majority of the homes built in the 1940s and 1950s were constructed between the years of 1948 and 1951, when a total of 80 buildings were constructed, representing almost half (44%) of the total homes built in the two decades. After the 1950s, construction steadily declined as the area became fully built out.
**Recommended Period of Significance**

In light of the development patterns for the area, a period of significance through 1952 would more accurately reflect the time at which development in the area was essentially complete. The buildings constructed between 1942 and 1952 were predominantly built on vacant lots as compatible infill development and represent architectural styles commonly found in the 1940s and early 1950s.\(^5\)

During a quick windshield survey of buildings built between 1942 and 1952, it was determined that approximately 86% of these resources would be considered "contributing," assuming the period of significance is extended to 1952 (see Map 10).

**2001-2002 Recommended National Register District**

The previously recommended National Register District boundary should be revised to include the buildings along the west side of 9th Street located between Baseline Road and College Avenue (see Map 5: 2001-2002 Recommended National Register District). These buildings relate visually to their counterparts on the east side of 9th Street and represent the same architectural styles and historic development patterns as found in the adjacent National Register District.

The cemetery was not included in the recommended National Register District because historically it was not the cemetery for the neighborhood, but rather served as the pioneer cemetery for the entire Boulder community. The cemetery is also individually listed on the National Register of Historic Places.

There are approximately 751 buildings in the recommended National Register Historic District. Of these, approximately 549 surveyed buildings (73%) are considered contributing and 54 surveyed buildings (7%) are considered non-contributing. Approximately 148 non-surveyed buildings (20%) are considered non-contributing (this includes buildings built between 1942 and 1952). *See Table 3: Site Status for National Register Eligible District*

Assuming a change in the period of significance and after an intensive level survey of buildings built between 1942 and 1952, it is anticipated that 88% of these buildings would contribute to the district. Therefore, the new total percentages for the district would be approximately as follows: 82% contributing and 18% non-contributing.

**2001-2002 Recommended Local Historic District**

The previously recommended Local Historic District boundary should be revised to include:

- Three properties at the northwest corner of 9th and Pleasant Streets
- Four properties at the intersection of Baseline Road and 17th Street
- Eighteen properties on the south side of University Avenue between 9th Street and Broadway

*(see Map 6: 2001-2002 Recommend Local Historic District)*

---

\(^5\) Sanborn Fire Insurance Maps, Carnegie Branch Library for Local History.
The local district boundary should be modified at the northwest boundary to include the three properties at the northwest corner of 9th and Pleasant Streets: 1301 9th Street, 1315 9th Street, and 1321 9th Street. The southeast boundary should be modified to include four buildings at the corner of Baseline and 17th Street: 1634 Baseline Road, 1642 Baseline Road, 711 17th Street, and 717 17th Street. These buildings are all considered contributing to the district, except for 1301 9th Street, which was built in 1960.

The south side of University Avenue between 9th Street and Broadway should be included in the local district boundary. These properties are located in the historic Capitol Hill Addition, along with adjacent properties on Pleasant Street and Pennsylvania Avenue. Of these eighteen properties, fourteen (78%) of the primary buildings are considered contributing and four (22%) are considered non-contributing. There are seven contributing outbuildings along the alley between University Avenue and Pleasant Street. Two buildings are considered individually significant: 908 University Avenue may be eligible for local landmark designation; 1134 University Avenue is eligible for the National Register.

There are approximately 902 buildings in the recommended Local Historic District. Of these, approximately 658 surveyed buildings (73%) are considered contributing: 505 buildings (56%) are contributing and 153 buildings (17%) are contributing-restorable. Approximately 67 surveyed buildings (7%) are considered non-contributing and 177 non-surveyed buildings (20%) are considered non-contributing (this includes buildings built between 1942 and 1952) see Table 4: Site Status for Local Eligible District.

Assuming a change in the period of significance and after an intensive level survey of buildings built between 1942 and 1952, it is anticipated that 86% of these buildings would contribute to the district. Therefore, the new total percentages for the district would be approximately as follows: 82% contributing and 18% non-contributing.

The consultants considered including 8th Street and 17th Street in the Local Historic District boundary; however, the majority of the buildings on these streets date from the late 1940s to the early 1950's and as a whole, represent a different development character than the adjacent historic district. The character of the recommended district is predominantly comprised of architectural styles from the early 1900s through the 1920s, with a scattering of post World War II structures. The character of 8th Street and 17th Street is the reverse: they are predominantly comprised of post World War II structures with a scattering of early 1900s structures. Both streets should be further evaluated for their potential as smaller locally eligible historic districts.
INDIVIDUALLY SIGNIFICANT BUILDINGS

Buildings that are listed on the National Register of Historic Places, field eligible to the National Register, designated City of Boulder Local Landmarks, or eligible local landmarks are all considered individually significant properties (see Map 7: Individually Significant Buildings).

Buildings Potentially Eligible to the National Register

Two properties have been listed on National Register since previous surveys: Columbia Cemetery (9th and Pleasant Streets) and Mt. St. Gertrude's Academy (965 Aurora Avenue).

In the year 2000, as part of the Modern Architecture Survey, two properties in the survey area were determined field eligible to the National Register: 1121 Broadway (built 1964) and 1135 Broadway (built 1960).

In previous surveys, eighty-three (83) buildings in the survey area were determined field eligible to the National Register (see Table 5). During the resurvey, two of these buildings were evaluated as experiencing "extensive alterations" which compromised their architectural integrity to the extent that they are no longer eligible:

**763 16th Street**: the original double-hung wood windows were replaced with casement windows.
**884 Grant Place**: second story addition.

884 Grant Place
Buildings Potentially Eligible for Local Landmark Designation

Previous surveys of the area identified structures potentially eligible to the National Register, which automatically results in eligibility for local landmark designation. During the resurvey, approximately forty-eight (48) additional buildings were determined potentially eligible for local landmark designation (see Table 6). In all cases, further research is recommended to determine significance and eligibility. This research may result in a determination of field eligibility for the National Register as well. The list of forty-eight buildings identified in the resurvey was not meant to preclude additional buildings in the study area from being determined eligible for local landmark designation in the future on a case-by-case basis.

Four of the buildings determined potentially eligible for local landmark designation were constructed after 1942 and have not yet been surveyed:

- **898 14th Street**: St. Thomas Aquinas University Parish. Built from 1949 to 1954 in the Italian Renaissance style and designed by architect John K. Monroe.
- **1001 13th Street**: Grace Evangelical Lutheran Church. Built in 1949 and designed by Charles Klauder, Architect, who designed many of the buildings at the University of Colorado. Remodeled in 1967 by Charles Haertling, Architect, who designed many of Boulder’s modern houses.
- **1290 Baseline**: Built 1948 and constructed of sandstone.
- **717 17th Street**: Built 1949 in the Art Moderne style.

![1001 13th Street, Grace Lutheran Church](image-url)
Nine buildings have been officially designated as local landmarks since the previous surveys (see Table 7):

- 701 9th Street: Skiff-Armstrong House
- 703 11th Street: Ekeley House
- 970 11th Street: Craftsman Tudor Style House
- 907 12th Street: Norlin House
- 727 13th Street: Youmans House
- 855 13th Street: Modernistic/Art Moderne
- 616 14th Street: Dyde-Rosall House
- 956 16th Street: University Hill Elementary School
- 842 Grant Place: Malde House
CONTRIBUTING OUTBUILDINGS

During the resurvey, a windshield survey was conducted for all outbuildings within the survey area. Buildings that appeared to be over fifty years old and in relatively original condition were identified as contributing outbuildings (see Map 8: Locally Contributing Outbuildings).

BUILDINGS THAT NO LONGER CONTRIBUTE

Approximately 13% of the buildings in the survey area experienced moderate alterations since previous surveys; however, not all of these alterations resulted in a change of building status. Some buildings experienced compatible second story, side or rear additions and are still considered contributing or contributing-restorable. Likewise, some building windows were replaced with compatible replacement windows.

The following buildings were inappropriately altered to the extent that they no longer contribute to the recommended National Register or Local Historic Districts:

724 9th Street: A second story addition and stucco over the original brick.
788 Grant Place: A second story addition clad with vertical wood siding.  
912 Grant Place: Currently being remodeled and extensively altered.  
930 Grant Place: The front has been completely altered with a stone segmentally arched entry set into a wood shingled façade and all new windows.  
1024 College Avenue: A second story addition.  
970 Lincoln Place: A large second story "pop top" gable end addition is being added to the existing building footprint.  
1044 Lincoln Place: A second story "pop top" addition is being added with a two-story addition on the south.  
1004 Pleasant Avenue: A third floor has been added with large dormers and a rear addition. The historic garage has been demolished.  

Some buildings changed from contributing to non-contributing at the National Register level, but remained contributing-restorable at the Local District level (for example, the building at 961-963 11th Street was altered with a front deck enclosure). A good example of a compatible second story addition can be found at 842 16th Street, which is still considered contributing to the potential National Register and Local Historic Districts.
NON-SURVEYED BUILDINGS

During the resurvey, approximately 179 non-surveyed buildings were identified in the survey area (see Map 9 and Table 8). Ninety-five (95) of these buildings were built between 1942 and 1952 (see Map 10 and Table 9).

Of these non-surveyed buildings, four buildings may be eligible for local landmark designation: 898 14th Street, 1001 13th Street, 1290 Baseline Road, and 717 17th Street.

During a quick windshield survey of buildings built between 1942 and 1952, it was determined that approximately 86% of these resources would be considered "contributing," assuming the period of significance is extended to 1952 (see Map 10). An intensive level survey of each building should be conducted to determine the building's status within the recommended historic districts.
OTHER RECOMMENDATIONS

1. Initiate an intensive-level survey of buildings constructed between 1942 and 1952 to determine building status within each recommended historic district.
2. Further evaluate 8th Street and 17th Street to determine the potential for two smaller locally eligible historic districts, representative of 1940s and 1950s development.
3. Further evaluate University Avenue from 4th Street to Broadway to determine the potential for a local historic.
4. The buildings and districts herein identified as eligible should be nominated to the National Register of Historic Places or locally designated as landmarks or structures of merit.
5. As mentioned in previous surveys, historic themes associated with the neighborhood should be further researched as part of Boulder’s Historic Context Project:
   - The influence of the transportation systems such as the streetcar and interurban on the growth of the area.
   - The development of fraternities and sororities, with an emphasis on the architects and architecture of such buildings.
   - Boulder architects, craftsmen, and builders in the area.
   - The presence of numerous vernacular stone houses of the 1920's and 1930's built in the area.
6. Submit multiple property nominations for fraternity and sorority houses in Boulder.
Local Landmark Buildings – Those buildings that are officially designated as City of Boulder local landmarks. These buildings have a special character and historical, architectural, or aesthetic interest or value in Boulder’s local history.

Individually Significant Buildings – Those buildings that are considered individually eligible for the National Register of Historic Places or local landmark designation. These buildings are typically fifty years of age or older, unless the building is an exceptional example of an architectural style or period.

Contributing Buildings – Those buildings built during the district’s period of significance that exist in comparatively “original” condition, or that have been appropriately restored, and clearly contribute to the historic significance of the district. Such buildings may have compatible additions.

Contributing Restorable Buildings – Those buildings built during the district’s period of significance that have original material that has been covered, or buildings that have experienced some alteration, but that still convey some sense of history. These buildings would more strongly contribute, however, if they were restored. Such buildings may have less compatible additions.

Non-Contributing Buildings – Those buildings built during the district’s period of significance that have been altered to such an extent that historic information is not interpretable, and restoration is not possible. This includes buildings erected outside the period of significance which are not individually significant.

Significant Newer Buildings – Those buildings that have not yet achieved historic significance but have achieved architectural significance as excellent examples of their period.

Note: Definitions provided by the City of Boulder Landmarks Preservation Advisory Board.
