

MEMORANDUM

April 2, 2014

TO: Landmarks Board

FROM: Lesli Ellis, Comprehensive Planning Manager
Marcy Cameron, Historic Preservation Planner
James Hewat, Senior Historic Preservation Planner

SUBJECT: Public hearing and consideration of a demolition permit for two buildings located at 640 Hawthorn Ave., non-landmarked buildings over 50 years old, pursuant to per Section 9-11-23 of the Boulder Revised Code 1981 (HIS2014-00033).

STATISTICS:

1. Site: 640 Hawthorn Ave.
2. Dates of Construction: c. 1920, c.1938
3. Zoning: RL-1 (Residential Low)
4. Lot Size: 6,715 sq. ft.
5. Owner/Applicant: Orion Creamer

STAFF RECOMMENDATION:

The Community Planning and Sustainability Department (CP&S) recommends that the Landmarks Board adopt the following motion:

I move that the Landmarks Board issue a stay of demolition for the building located at 640 Hawthorn Ave., for a period not to exceed 180 days from the day the permit application was accepted by the city manager, adopting the staff memorandum with the findings as listed below, in order to further explore alternatives to demolishing the building.

Staff encourages the applicant to consider landmark designation of the house and its incorporation into future redevelopment plans for the site. A 180-day stay period would expire on Aug. 23, 2014.

Should the board choose to issue the demolition permit, or if the permit is allowed to expire, staff recommends that prior to demolition the following be submitted to CP&S staff for review, approval and recording with Carnegie Library:

1. A site plan showing the location of all existing improvements on the subject property;

2. Black and white medium format archival quality photographs of the interior and exterior of the house and shed.

SUMMARY:

On Feb. 14, 2014, the Community Planning and Sustainability Department received a demolition permit application for two buildings at 640 Hawthorn Ave. The buildings are not in a designated historic district or locally landmarked, but are over 50 years old, and the proposed work meets the criteria for demolition defined in Section 9-16-1 of the Boulder Revised Code 1981. On Feb. 19, 2014, the Landmarks design review committee (Ldrc) referred the application to the Landmarks Board for a public hearing, finding there was “probable cause to believe that the building may be eligible for designation as an individual landmark.”

After detailed analysis, staff considers that the property meets the significance criteria for individual landmark designation containing as it does, two well-preserved houses dating from north Boulder’s agricultural and early residential period. For this reason staff recommends the Landmarks Board issue a stay of demolition for the residence located at 3615 Broadway, for a period not to exceed 180 days from the day the permit application was accepted by the city manager

PURPOSE OF THE BOARD’S REVIEW:

Pursuant to section 9-11-23(d)(2), B.R.C. 1981, demolition requests for all buildings built prior to 1940 requires review by the Landmarks design review committee (Ldrc). The Ldrc is comprised of two members of the Landmarks Board and a staff member. If, during the course of its review, the Ldrc determines that there is “probable cause to consider the property may be eligible for designation as an individual landmark,” the issuance of the permit is stayed for up to 60 days from the date a completed application was accepted and the permit is referred to the board for a public hearing.

If the Landmarks Board finds that the buildings proposed for demolition may have significance under the criteria in subsection (f) of Section 9-11-23, B.R.C. 1981, the application shall be suspended for a period not to exceed 180 days from the date it was accepted by the city manager as complete, in order to provide the time necessary to consider alternatives to the building demolition. If imposed, a 180-day stay period would start when the completed application was accepted by the city manager (Feb. 24, 2014, when the Landmarks Board fee was paid) and expire on Aug. 23, 2014. Section 9-11-23 (g) and (h), B.R.C. 1981.

DESCRIPTION:

The subject property is located on the south side of Hawthorn Ave., between 6th and 9th Streets and not located in a designated or potential historic district. Until 1953, Hawthorn Ave. was known as Seventh Avenue.

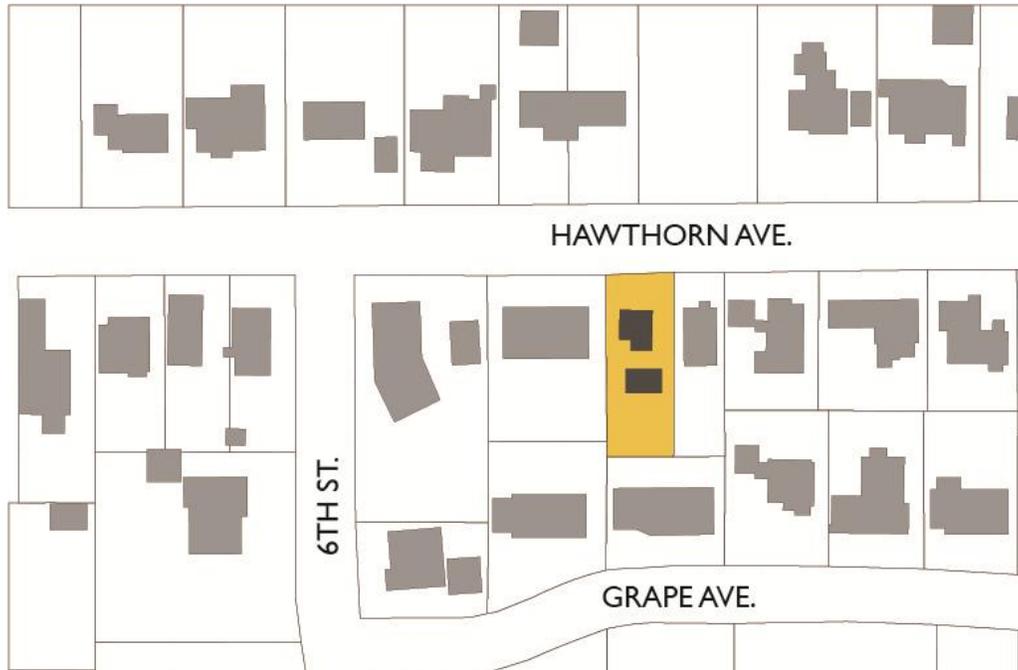

Figure 1. Location Map showing 640 Hawthorn Ave.

Figure 2. Northeast corner of primary house, 640 Hawthorn Ave., 2014.

The primary building at 640 Hawthorn Ave. has a one-story, side gable form with overlapping front gables above the entrance. The front entrance is flanked by an eight-over-one double-hung window and a six-over-one double-hung window. The wood door appears to have three narrow windows set off-center. The building has closed eaves with decorative exposed beams under the eaves. The exterior walls are clad in wide lap aluminum siding and the roof is sheathed in a standing-seam metal, not evident in the c. 1958 tax assessor photograph. Two bay windows, one gabled and one hipped, are located on the east elevation. A lantern light fixture is located above the entrance. *See Attachment A: Current Photographs*

Figure 3. East and South Elevations of Primary House, 640 Hawthorn Ave., 2014

Figure 4. West Elevation of Primary House, 640 Hawthorn Ave., 2014

The building retains much of its original form and materiality. The original wood windows and doors remain. The c. 1958 tax assessor photograph indicates the building was clad in wood shingles at that time and the roof was sheathed in wood shingles. The building is currently clad in aluminum siding and has a metal roof. A brief inspection indicates the wood shingle siding remains beneath the aluminum siding.

Figure 5. Houses at 650 (L) and 640 Hawthorn Ave., facing southeast, 2014

A secondary residential building is located behind the main house. Its exact date of construction is unknown. The address of 640 ½ Hawthorn Ave. first appears in the city directories in 1940, though it appears that the house was constructed prior to 1930. The one-story house features a low, front gable roof with a simple, full-length porch at the east facing facade which features two wood 10-light windows with metal storm windows flanking a divided light wood door with a metal storm door. Wood picket fencing, not visible in the c.1958 tax assessor card, encloses the front porch. The house retains its original drop siding while the gable end of the front porch is clad in wood shingles. The building has shallow eaves with exposed brackets, while the east elevation features divided light wood windows and two shed additions. A skylight is located on the east slope of the roof, which is sheathed in a standing metal-seam roof. The south (rear) elevation of the house features a wood casement window, and multi-paneled door with a shed roof above. The west elevation features three openings with wooden surrounds.

Figure 6. Rear House at 640 Hawthorn Ave., east façade, 2014

Figure 7. Rear House at 640 Hawthorn Ave., north elevation, 2014

Figure 8. Rear House at 640 Hawthorn Ave., east façade, 2014

The property features a few mature trees but is otherwise open lawn. A stone walkway and low iron fence with stone piers, visible in the c. 1958 tax assessor photograph, is located along the north property line.

NEIGHBORHOOD HISTORY¹

Prior to World War-II, North Boulder was predominately agricultural, consisting of cropland and cattle grazing. Truck gardens, orchards, and fruit cultivation were undertaken in small parcels of twenty acres and less. Well-known, large farms and ranches were located in this area of Boulder in the early 1900's, such as the Maxwell ranch near Linden Ave., where cattle were raised, and the Wolff farm to the southeast where wheat, dairy cattle and fruit trees were raised.

In the late 1800s and early 1900s, most land in this area of Boulder was owned by James P. Maxwell, who had purchased the land from the U.S. Government in 1880. At that time, Maxwell acquired several thousand acres west of Broadway and north of what is now Hawthorn. These lands were primarily irrigated by Silver Lake Ditch (1888), which was constructed by Maxwell to water 1,000 acres of land in north Boulder. By the early 1900s, Maxwell began selling off the level land in small tracts of one to five acres; many of these tracts were sold with water rights to Silver Lake Ditch. Since these tracts were well outside of the city limits, there was no restriction as to the use of the land; many of the owners planted orchards and truck gardens and continued this usage until the beginning of the building boom after World War II. See *Attachment F: North Boulder Historical Background*

PROPERTY HISTORY

James P. Maxwell originally owned a large parcel of land in north Boulder, including the tract now known as 640 Hawthorn Ave. The 1915 Drumm Wall Map shows A. Spier as the owner of the subject property and those immediately adjacent to it. There is one building footprint shown on the lot, located in approximately the same location at 640 Hawthorn Ave. It is possible that the rear house (listed as 640 ½ Hawthorn Ave. in city directories) is the building shown on the Drumm Map. The city directories first list the addresses along Seventh Ave. (now Hawthorn Ave.) in 1932. A second address (listing both 640 and 640 ½ Hawthorn) first appears in 1938, when the primary house (along with the neighboring house at 650 Hawthorn Ave.) was constructed.

In 1915, Anton Spier owned the property. Spier emigrated from Germany with his wife, Julia, and young son in 1881 and remained in Colorado for the duration of his life, where he was a fruit farmer. The Spiers had nine children, including Joseph, who worked as a laborer, and Charles, who worked as a miner. The Spiers lived at 3261 3rd St. from at least 1901 until 1932. Mr. Spier died in 1932 and Mrs. Spier died in 1933.

¹ North Boulder Historic Overview, 1994.

Manuel and Mary Kellogg purchased the property in 1933 and are the first residents listed in the city directory. Tract 404 was divided into three lots that same year, and sold to separate owners. A house similar to the primary house at 640 Hawthorn Ave. was constructed around the same time on the adjacent lot at 650 Hawthorn Ave. That house has since been significantly altered. See Figure 13. 650 and 640 Hawthorn Ave.

Manual Kellogg was a carpenter contractor. He was born in Livingston, Michigan in 1867 and came to Boulder in the 1890s for the health of his first wife. She died in Boulder, and in 1897, he married Mary Green. Mary Athelia Green Kellogg was born in Minnesota in 1873 and came to Boulder in 1896. In 1906, the Kelloggs moved to California but returned in 1915. Mrs. Kellogg was active in the 7th Day Adventist Church. Together they raised 7 children: Eva Bell, Ethell, Vernon, Bernice, Melvin, Robert and Hope. Vernon Kellogg also lived on Hawthorn Ave. and worked for the Mountain States Telephone Company. Mrs. Kellogg died in 1942 and Mr. Kellogg in 1949. The Kelloggs owned the property for eleven years, selling it upon the death of Mr. Kellogg.

During the ownership of the property by the Kelloggs, the rear house was rented out to numerous residents, including Cecil and Rosella Fidler, Esther Smith and Don and Lela Tripp. Don Tripp owned and operated Tripp's Market, located at 2025 Broadway. The Tripps resided at 1302 Cedar for the majority of their time in Boulder.

The house was sold a number of times between 1944 and 1949, before it was purchased by Eugene Kartchner, a student at the University of Colorado. Mr. Kartchner resided in the primary house in 1951 and rented out the rear house.

The next long-term owners were William and Rosemary Johnson, who owned the house from 1950 until approximately 1961. They resided in the house from 1952 until 1954, and then rented out both properties. Mr. Johnson was a carpenter and material clerk at Mountain States Telephone and Telegraph Company. Occupations of the residents during this time included an employee of Rocky Flats, a carpenter, a test engineer for Beech Aircraft, a University of Colorado student and visiting professor, and a shop clerk. One of the property's longest tenants during this time was Mary Rathfon, who worked in the food services division at the University of Colorado and lived there until at least 1979.

Ms. Rathfon was born in Kansas in 1900 and married Karl Rathfon. In the 1910s and 1920, they resided in Tacoma, Washington, where Mr. Rathfon worked as a bookkeeper. In 1940, they lived in Los Angeles and Mr. Rathfon worked as a retail sales manager. Ms. Rathfon died in Boulder in 1981.

The current owners purchased the property in 2009.

CRITERIA FOR THE BOARD'S DECISION:

Section 9-11-23(f), B.R.C. 1981, provides that the Landmarks Board "shall consider and base its decision upon any of the following criteria:

- (1) The eligibility of the building for designation as an individual landmark consistent with the purposes and standards in Sections 9-11-1 and 9-11-2, B.R.C. 1981;
- (2) The relationship of the building to the character of the neighborhood as an established and definable area;
- (3) The reasonable condition of the building; and
- (4) The reasonable projected cost of restoration or repair.

In considering the condition of the building and the projected cost of restoration or repair as set forth in paragraphs (f)(3) and (f)(4) ..., the board may not consider deterioration caused by unreasonable neglect.

As detailed below, staff considers this property eligible for designation as an individual landmark.

CRITERION 1: INDIVIDUAL LANDMARK ELIGIBILITY

The following is a result of staff's research of the property relative to the significance criteria for individual landmarks as adopted by the Landmarks Board on Sept. 17, 1975.

See Attachment E: Individual Landmark Significance Criteria

HISTORIC SIGNIFICANCE:

Summary: The house located at 640 Hawthorn Ave. meets historic significance under criteria 1.

1. Date of Construction: c. 1915, 1938

Elaboration: The tax assessor identifies the date of construction as 1920, however a building footprint appears on the 1915 Drumm Wall map. The primary house was constructed in 1938.

2. Association with Persons or Events: N/A

Elaboration: None of the occupants appear to have local, state or national significance.

3. Development of the Community: Agriculture

Elaboration: Throughout the early 20th Century, this area of Boulder was primarily agricultural, with its earliest residents listed as farmers, gardeners, or nurserymen.

Many more well-known, large farms and ranches were located in this area of Boulder in the early 1900's. Anton Spier, an early owner of the property, was a fruit farmer.

4. Recognition by Authorities: Front Range Research Associates, Inc.

Elaboration: The 1995 architectural survey identifies the house as a representative example of the English/Norman Cottage style, evident in its overlapping gables, multi/single-light windows, and gabled entrance with wrought iron lantern.

ARCHITECTURAL SIGNIFICANCE:

Summary: The house located at 640 Hawthorn Ave. meets historic significance under criteria 1.

1. Recognized Period or Style: English/Norman Cottage Style

Elaboration: The front house is an example of the English/Norman Cottage influenced design, as reflected in its steeply pitched roof with overlapping gables, multi/single-light windows, and gabled entrance with a wrought iron lantern. The house retains its original form and material, though it has been clad in aluminum siding over wood shingle visible in the Tax Assessor photograph. The original shingled roof has been covered with a standing-metal seam roof.

Stylistically, the small house at the rear of the property is best described as vernacular frame with Craftsman design elements including its low pitch roof, overhanging eaves, engaged porch, exposed rafter tails and double hung windows. The form and design of the building (including drop siding) is indicative of construction in Boulder during the late 1910s or 1920s. With the exception of the addition of a standing seam roof, the building appears to have changed very little over the years.

With the exception of the described changes to roofing and siding, both buildings maintain a high degree of historic integrity.

2. Architect or Builder of Prominence: None known

3. Artistic Merit: None observed

4. Example of the Uncommon: None observed.

5. Indigenous Qualities: None observed

ENVIRONMENTAL SIGNIFICANCE:

Summary: The house located at 640 Hawthorn Ave. meets environmental significance under criterion 1.

1. **Site Characteristics:** The house sits on a small lot, with a number of mature trees. The low, wrought iron fence with stone piers, evident in the c. 1958 tax assessor photograph, still exists.
2. **Compatibility with Site:** This area of the Newlands neighborhood has changed dramatically in the last two decades. Much of the area's historic context has been lost. This house is dwarfed by the adjacent houses.
3. **Geographic Importance:** None observed.
4. **Environmental Appropriateness:** None observed
5. **Area Integrity:** This property may provide historic and environmental importance or significance as a representative example of the character of this area of Boulder in the early 20th Century. However, the area as a whole has lost much of its original context.

CRITERION 2: RELATIONSHIP TO THE CHARACTER OF THE NEIGHBORHOOD:

This property is an interesting example illustrating the development of this area of Boulder during the first half of the twentieth century. In the early twentieth century, the area consisted primarily of farms, orchards and ranches; by the 1940s, residential development had begun in earnest. Many of the area residents worked as carpenters, shopkeepers, and for companies such as the Mountain States and Telephone Company. The area has changed dramatically from its rural character. This section of Hawthorn retains a few intact older houses and many of the houses constructed recently are out of character with the area's historic rural character.

CRITERION 3: CONDITION OF THE BUILDING

No information regarding the condition of the building has been submitted at this time. Slight buckling at the foundation on the east side was observed during a site visit, but overall the building appears to be in fair condition; the original wood shingle siding is evident beneath the aluminum siding.

CRITERION 4: PROJECTED COST OF RESTORATION OR REPAIR:

No information regarding the projected cost of restoration or repair has been submitted at this time.

ANALYSIS:

Staff considers that there is “probable cause” to consider the property at 640 Hawthorn Avenue may be eligible for designation as an individual landmark based upon its historic and architectural significance with two well-preserved houses dating from the first half of the twentieth century.

NEIGHBORHOOD COMMENT:

Staff has received no comment to date from the public on this matter.

THE BOARD’S DECISION:

If the Landmarks Board finds that the building to be demolished does not have significance under the criteria set forth in section 9-11-23(f), B.R.C. 1981, the city manager shall issue a demolition permit.

If the Landmarks Board finds that the building to be demolished may have significance under the criteria set forth above, the application shall be suspended for a period not to exceed 180 days from the date the permit application was accepted by the city manager as complete in order to provide the time necessary to consider alternatives to the demolition of the building (section 9-11-23(h), B.R.C. 1981). A 180-day stay period would expire on Aug. 23, 2014.

FINDINGS:

Staff recommends that the Landmarks Board adopt the following findings:

A stay of demolition for the house at 640 Hawthorn Avenue is appropriate based on the criteria set forth in Section 9-11-23(f), B.R.C. 1981 in that:

1. The property may be eligible for individual landmark designation based upon its historic and architectural significance and as a property containing two well-preserved examples of working-class houses in North Boulder dating from the first half of the twentieth century.
2. The property contributes to the character of the neighborhood as an intact representative of the area’s past;
3. It has not been demonstrated to be impractical or economically unfeasible to rehabilitate the building.

SIGNIFICANCE CRITERIA

Individual Landmark

September 1975

On September 6, 1975, the City Council adopted Ordinance #4000 providing procedures for the designation of Landmarks and Historic Districts in the City of Boulder. The purpose of the ordinance is the preservation of the City's permitted cultural, historic, and architectural heritage. The Landmarks Board is permitted by the ordinance to adopt rules and regulations as it deems necessary for its own organization and procedures. The following Significance Criteria have been adopted by the board to help evaluate each potential designation in a consistent and equitable manner.

Historic Significance

The place (building, site, area) should show character, interest or value as part of the development, heritage, or cultural characteristics of the community, state or nation; be the site of a historic, or prehistoric event that had an effect upon society; or exemplify the cultural, political, economic, or social heritage of the community.

Date of Construction: This area of consideration places particular importance on the age of the structure.

Association with Historical Persons or Events: This association could be national, state, or local.

Distinction in the Development of the Community of Boulder: This is most applicable to an institution (religious, educational, civic, etc) or business structure, though in some cases residences might qualify. It stresses the importance of preserving those places which demonstrate the growth during different time spans in the history of Boulder, in order to maintain an awareness of our cultural, economic, social or political heritage.

Recognition by Authorities: If it is recognized by Historic Boulder, Inc. the Boulder Historical Society, local historians (Barker, Crossen, Frink, Gladden, Paddock, Schooland, etc), State Historical Society, The Improvement of Boulder, Colorado by F.L. Olmsted, or others in published form as having historic interest and value.

Other, if applicable.

Architectural Significance

The place should embody those distinguishing characteristics of an architectural type specimen, a good example of the common; be the work of an architect or master builder, known nationally, state-wide, or locally, and perhaps whose work has influenced later development; contain elements of architectural design, detail, materials or craftsmanship which represent a significant innovation; or be a fine example of the uncommon.

Recognized Period/Style: It should exemplify specific elements of an architectural period/style, i.e.: Victorian, Revival styles, such as described by *Historic American Building Survey Criteria*, Gingerbread Age (Maass), 76 Boulder Homes (Barkar), The History of Architectural Style (Marcus/Wiffin), Architecture in San Francisco (Gebhard et al), History of Architecture (Fletcher), Architecture/Colorado, and any other published source of universal or local analysis of a style.

Architect or Builder of Prominence: A good example of the work of an architect or builder who is recognized for expertise in his field nationally, state-wide, or locally.

Artistic Merit: A skillful integration of design, material, and color which is of excellent visual quality and/or demonstrates superior craftsmanship.

Example of the Uncommon: Elements of architectural design, details, or craftsmanship that are representative of a significant innovation.

Indigenous Qualities: A style or material that is particularly associated with the Boulder area. Other, if applicable.

Environmental Significance

The place should enhance the variety, interest, and sense of identity of the community by the protection of the unique natural and man-made environment.

Site Characteristics: It should be of high quality in terms of planned or natural vegetation.

Compatibility with Site: Consideration will be given to scale, massing placement, or other qualities of design with respect to its site.

Geographic Importance: Due to its unique location or singular physical characteristics, it represents an established and familiar visual feature of the community.

Environmental Appropriateness: The surroundings are complementary and/or it is situated in a manner particularly suited to its function.

Area Integrity: Places which provide historical, architectural, or environmental importance and continuity of an existing condition, although taken singularly or out of context might not qualify under other criteria.

NORTH BOULDER HISTORIC OVERVIEW

Agricultural and Transportation Development

Agriculture was the dominant pursuit in the North Boulder area prior to World War II. Truck gardens, orchards, and fruit cultivation were undertaken on small parcels of twenty acres and less. Cattle ranching was also important. The Farmers and Silver Lake ditches flow northward through the area and provide irrigation water to the region's agricultural endeavors. The Farmers Ditch (Priority Number 14) first diverted water from Boulder Creek in 1862. The Silver Lake Ditch (Priority Number 48) was developed by James P. Maxwell and George Oliver in 1888. The latter ditch supplied water to Mesa Reservoir (1893), located to the northeast, and to Mesa Park Reservoir (now Wonderland Lake), which was created about 1905.¹

A natural transportation corridor northward along the hogback extended through the North Boulder area. An early wagon road connected Boulder and Lyons, extending from the end of 12th Street (Broadway) in Boulder. In the early 1880s, the Boulder, Left Hand, and Middle Park Railroad was organized by C.G. Buckingham, James P. Maxwell, and others to construct a line north from Boulder, westward up Left Hand Canyon, over Buchanan Pass, to the coal fields of Middle Park. From 1881 to 1883 a road bed was graded through North Boulder west of Broadway to the mouth of Left Hand Canyon. The project was abandoned before any rails were laid along the route.²

Residents of North Boulder

The most prominent member of the agricultural community in North Boulder was James P. Maxwell, who lived northwest of present-day Broadway and Linden. Born in Bigfoot, Wisconsin, in 1839, Maxwell came to Colorado with his father in 1859 and settled in Boulder in 1870. Maxwell, for whom the Boulder street is named, compiled a long career of public service, serving as a Colorado State Senator (1876-80 and 1896-1900), State Engineer (1888-93), mayor of Boulder (1878-80), and Boulder County Treasurer (1880-82). In private affairs, Maxwell was one of Boulder's most active pioneers. He served as president of the First National

Bank of Boulder and was active in many development projects in Boulder County, including surveying, real estate, irrigation development, road building, and cattle raising.³

Maxwell became involved in cattle ranching in the North Boulder area around 1893. In 1906, he built a large, two-story brick home on Maxwell Hill north of Linden (addressed as 3737 Broadway). The home was surrounded with orchards (See Figures 1 and 2). Maxwell died in 1929 but his sons, Mark N. ("Marc") and Clinton J., continued to live at the homestead. They formed the Maxwell Brothers Registered Hereford Company and engaged in the cattle business for many years. Clinton died in 1958 and Mark in 1960. Other members of the Maxwell family were also involved in the development of the North Boulder area.⁴

South and southwest of Maxwell Hill, in the area today bounded by Broadway west to 4th Street and Linden south to Juniper, was an area of agricultural parcels. One of the better known farms here was the Cunningham place at 3703 4th Street, which consisted of a portion of the Maxwell Ranch sold to Oscar and Lottie Johnson in 1916. The site featured a two story house and barn (both with fieldstone first stories) and assorted outbuildings (See Figure 3). The farm was sold to Walter and Minnie Wamser in 1944. Minnie (Wamser) Cunningham lived on the farm until her death in 1984. Ms. Cunningham ran a large herd of goats, and the tendency of the goats to stray onto adjoining lands led Mark Maxwell to seek an injunction and damages against her in 1952.⁵

Other agricultural settlers in the area south of Maxwell Hill included: William G. and Mildred S. Sutherland (a landscape gardener and nurseryman); Everett M. and Belle D. McCaslin (a farmer); Walter H. and Ella Wilson (a fruit grower); John M. and Jennie Conley (a market gardener); Burns R. and Emma Glidden (a farmer); and Quinsy A. and Mabel F. Zimmerman (a gardener).⁶

William W. and Anna J. Wolf owned twenty acres at the northeast corner of Broadway and Iris. Wolf, a stockman, came to the site

in 1891 and developed a large orchard of apple trees. A large house surrounded by maple trees (see Figure 4) and a barn were among the improvements at the farm.⁷ Farms were more scattered east of the Wolf farm along present-day Iris Avenue and the quarter section roads extending northward (present-day 19th and 26th streets). For example, Adam C. Fye was located northeast of 19th and Iris, while Carl G. and Johanna Johnson lived northwest of 26th and Iris. A slaughterhouse owned by E.P. Euler and Charles Voegtle was located south of the Farmers Ditch just east of 19th Street. Euler operated a meat store at 1425 Pearl Street.⁸

Development Activity

A few historic subdivisions were platted in the north Boulder area. The 1910-era Wellington Gardens subdivision was one component of W.W. Degge's Wellington System of the Consolidated Realty and Investment Company. Wellington Gardens embraced more than four square miles, including most of North Boulder north of present-day Norwood, as well as lands to the northeast (See Figure 5). The property was purchased from James P. Maxwell and the Tyler estate and reportedly had hundreds of acres of alfalfa under cultivation. The subdivision was planned as irrigated fruit and garden tracts, bringing "the agricultural center of the county right to the doors of Boulder, where it can be marketed with the least expense and the greatest return." The Wellington Terrace subdivision, platted on sixty acres purchased from W.W. Wolf in 1908, was also developed by Degge. Located immediately north of Wolf's homestead on Broadway, the subdivision was laid out in a more typically residential manner with smaller lots.⁹

In 1918, the Boulder County Hospital and Poor Farm relocated to the North Boulder area on William W. Wolf's twenty acre site. The original Wolf residence was used by the institution, additions constructed, and new buildings added to the site (See Figure 6). The facility stopped functioning in 1962 and was subsequently used by the County Health Department and other county governmental activities.¹⁰

Post World War II Developments

The area north of Iris, while adjacent to the City of Boulder, was not annexed to the city until fairly recent times. The first annexation of land in North Boulder north of Iris Avenue occurred in 1954 with the acquisition of the Boulder County Hospital grounds at Broadway and Iris. Large pieces of the area were brought into the city in 1957 and 1959, 1978, and 1990. Scores of smaller parcels in the area have also been annexed.¹¹

Post World War II developments in the area have included the emergence of a commercial strip along North Broadway and the construction of the 28th Street Bypass, extending diagonally from the vicinity of 28th and Jay Road to Broadway north of Lee Hill Road. Maxwell Reservoir, a city water distribution facility west of Maxwell Hill, was completed in June 1953. A National Guard Armory and the Holiday Twin Drive-In Theater were constructed in the area southeast of Broadway and Lee Hill Road. Mobile home parks and townhome developments have also occurred in the area.
