

# Access Management & Parking Strategy

**Boulder** is a national leader in providing options for access, parking and transportation. To support the community's social, economic and environmental goals, it is important to create customized solutions that meet the unique access goals of Boulder's diverse districts, residential and commercial.

**AMPS:** A balanced approach to enhancing access to existing districts and the rest of the community by increasing travel options — biking, busing, walking and driving — for residents, commuters, visitors and all who enjoy Boulder.

## TOOLS FOR CHANGE

district management
